

A complete solution for **organizing, managing and growing** your research computing environment in the cloud

Managed Services

Consulting

Define your **cloud-first approach strategy**

- Project technical refinement
- Proof of Concept

Discngine SaaS

Host your **Discngine's softwares**

- 3Decision
- Assay
- Qualification

Lift & Shift & Host

Leverage your legacy applications and make them live on the cloud

Custom development & hosting

Enjoy the benefits of **applications or components designed to meet your specific needs**, which make the most of the cloud

3rd party software hosting

Host your **3rd party softwares**

HPC on demand

Get **additional High Performance Computing resources** when you need them, for the time you need them, the way you need them

Connectivity to external databases

Maintain **complete and reliable connectivity to your critical databases** whether they are on premise or public

Containerization and Kubernetes orchestration

Benefit from **containerization of legacy, complex and standard workloads**, running on :

- Kubernetes
- Openshift
- Docker Swarm

Dedicated to **Life Sciences Research**

Designed to run **biological and chemical workloads**

Engineered to **handle High-Performance Computing (HPC) workloads**

A **seamless process** from development to delivery and hosting

A **secured** environment

ISO 27001 security standard

Choice of your **data residence** and the regulations that apply to its use

Full control of your users' access

Easy and **under control**

Minimized effort required to install, configure and maintain your software

Adjustable performance of your solution

Fixed costs kept to a minimum and payment only for what you use

Benefit from a solution **designed for Life Sciences Research**
